

MOCAPP

Manage the risk associated with change to your facilities, operations, or personnel with the powerful Enviance Management of Change App.

POWERFUL. SIMPLE. INTUITIVE. MOBILE.

The Management of Change App (MOCApp) is a collaborative solution which allows for the management and documentation of all change requests, from logging a new request and performing an evaluation to implementation, process safety review and final approval.

Gain visibility to the current status of any MOC request and associated actions, ensure potential hazards introduced by a change are identified, analyzed, and controlled, and produce an audit trail of activities associated with past changes. Key elements include:

- Simple interface allowing users to issue or access change requests from a mobile device.
- Document management for sharing of change-related information such as pictures, documents and discipline-specific data.
- Powerful form designer to easily incorporate your own department specific checklists and ensure a standardized and thorough analysis for each potential change.
- Flexible process which can be configured to support your organization specific process and accommodate revision cycles and requests for more information.
- Action tracking to request, manage and complete related activities such as the updating of safety information, operating procedures or practices related to the change.
- Automatic notifications to keep you informed of approvals or requests for more information.
- Simple search for outstanding change requests to easily see the status of each request.

ENSURE A CONSISTENT PROCESS

Use the standard process provided with the app, or tailor the app to follow your organization's already established process, departments and review or approval requirements. Forms may be customized per department to ask for discipline-specific information.

SIMPLIFY EXECUTION

The MOCApp's interface facilitates collaboration by quickly disseminating and gathering information and provides multiple stakeholders direct access to view all evaluation forms. Follow-up actions may be created, assigned, and tracked to completion.

COMBINE EFFICIENCY AND QUALITY

The MOCApp combines a robust approval process and instant notifications with powerful, intelligent and dynamic forms, guaranteeing both efficiency in data capture as well as quality and conformance with the mandated business process.

ACCESS ANYWHERE

Need mobility? No problem. MOCApp can be used on any HTML5 browser, enabling you to access your change requests in the field via any mobile device (iPad, iPhone, tablets/phones using Google Chrome) and at your desktop.

Based in Carlsbad, California, Enviance is a leader in cloud-based Environmental, Health and Safety (EH&S) software, leveraging cloud computing technology to deliver its platform online in real-time—anywhere, anytime and enterprise-wide. Deployed by some of the world's leading corporations and governments, the company's solutions enable organizations to better measure, manage and report mission-critical EH&S data.
